

## Solaria PowerXT® 405C-WX | Solaria PowerXT® 400C-BX

At over 400Wp rating, Solaria PowerXT solar modules are one of the highest power products available today. Solaria PowerXT modules are ideal for utility projects by requiring fewer balance of system components and thus reducing installation time. Solaria PowerXT commercial modules are manufactured with a white backsheet (PowerXT-405C-WX) or black backsheet (PowerXT-400C-BX).

Developed in California, Solaria's patented cell cutting and module assembly form high-density sub-strings, which are packed more efficiently and reduce inactive space between cells. By utilizing a ribbon-less interconnection process, cells are cut and overlaid without soldering, which creates highly reliable sub-string assemblies in a cost effective manner.

### Higher Efficiency, Higher Power

Solaria PowerXT modules achieve over 19% efficiency, while conventional silicon 72-cell modules achieve 15-17% efficiency. Solaria PowerXT modules are one of the highest power modules available.

### Lower System Costs

Solaria PowerXT modules produce more power per square meter area. This reduces installation costs due to fewer balance of system components.

### Improved Shading Tolerance

Sub-strings are interconnected in parallel, which dramatically lowers the shading losses and boosts energy yield.

### Improved Aesthetics

Large sub-strings reduce inactive space within a module and create a premium "look and feel" compared to conventional modules.

### Durability and Reliability

Solder-less cell interconnections are highly reliable and designed to far exceed the industry leading 25 year warranty.

### Easily Integrated with Solaria PowerVision™ Architectural Solar

Additional benefits of Solaria PowerVision include attractive aesthetics, compelling economics, energy efficiency, high energy yield and design flexibility.

## About Solaria

Established in 2000, The Solaria Corporation has created one of the industry's most respected IP portfolios, with over 100 patents encompassing materials, processes, applications, products, manufacturing automation and equipment. Headquartered in Fremont, California, Solaria has developed a technology platform that unlocks the potential of solar energy allowing it to be ubiquitous and universally accessed.

## Mechanical Characteristics

Cell Type	Monocrystalline Silicon
Dimensions (L x W x H)	2113 x 995 x 40 mm
Weight	29 kg / 64 lbs
Glass Type / Thickness	AR Coated, Tempered / 4.0mm
Frame Type	Anodized Aluminum
Cable Type / Length	12 AWG PV Wire (UL) / 1200mm
Connector Type	Amphenol H4 (MC4 compatible)
Junction Box	IP67 / 3 diodes
Front Load (UL 1703)	5400 Pa / 113 psf
Rear Load (UL 1703)	2400 Pa / 50 psf

## Certifications / Warranty

Certifications	UL 1703 / IEC 61215 / IEC 61730
Fire Type (UL 1703)	7
Power & Product Warranty	25 years*
